Product Change Notification
TAJ Tantalum Standard Suffix Change to *NJ

As a result of feedback from our customers and an attempt to unify product part numbers globally, AVX is intending to revise the standard TAJ series part number (PN) to include the *NJ ending as the last suffix letters.

The older PN structure for standard product:

<table>
<thead>
<tr>
<th>TAJ</th>
<th>D</th>
<th>107</th>
<th>M</th>
<th>006</th>
<th>R</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type</td>
<td>Case Size</td>
<td>Capacitance Code</td>
<td>Capacitance Tolerance</td>
<td>Rated DC Voltage</td>
<td>Packaging</td>
</tr>
</tbody>
</table>

The New PN structure for standard product:

<table>
<thead>
<tr>
<th>TAJ</th>
<th>D</th>
<th>107</th>
<th>M</th>
<th>006</th>
<th>RNJ</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type</td>
<td>Case Size</td>
<td>Capacitance Code</td>
<td>Capacitance Tolerance</td>
<td>Rated DC Voltage</td>
<td>Packaging</td>
</tr>
</tbody>
</table>

The new PN structure maintains the first suffix letter (#) and adds the two additional characters NJ to the suffix. The older PN structure and the new PN structure refer to the same product so there is no change in form, fit or function.

The new NJ suffix part number will be mandatory for all new specification builds and replaces the old part number for already open orders placed on the system.
