AVX is the leading supplier of high reliability surface mount tantalum capacitors for military, aerospace, and medical applications. As tantalum technology continues to develop, we are able to offer extended ratings in our products by providing more downsizing opportunities, higher capacitance ratings, new case sizes, and low ESR options.
AVX is the leading supplier of high reliability solid tantalum capacitors for space applications. AVX developed the SRC9000 specification to allow users to select ratings in our TAZ, TBJ, TBM and TBC range with testing appropriate for satellite applications. We offer the widest range of ratings and test options in the industry.

### SRW9000 SPACE LEVEL

#### TWS SERIES

- High Capacitance Values With Additional Mechanical Stability for Increased Vibration Capability
- Enhanced Thermal Shock Testing
- Customized Capacitance and Voltage Packages are Possible

**Case:** T1-T4  
**Voltage:** Up to 100V  
**Capacitance:** Up to 2,200µF  
**Style:** Hermetically Sealed Axial Leaded

#### TWC SERIES

- Standard & Extended Range CV
- Capable of Meeting Harsh Shock and Vibration Conditions

**Case:** T1-T4  
**Voltage:** Contact AVX  
**Capacitance:** Contact AVX  
**Style:** Hermetically Sealed Axial Leaded

## The AVX COTS-Plus tantalum capacitors offer cost effective solutions based on MIL-PRF-55365 standards. Customer screening options are available from Weibull burn-in to the highest space level testing AVX has to offer, our internal SRC9000 specification.

### TAZ SERIES
- **Case:** A-H Plus R & X
- **Voltage:** Up to 50V
- **Capacitance:** Up to 33µF
- **Reliability:** Weibull Grading
- **Style:** Molded SMD
- **Features:**
  - Widest Range of Case Sizes
  - Most Flexible of Surface Mount Form Factors

### TCP SERIES – 09009
- **Case:** 2H, 4H, & 6H
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,980µF
- **Reliability:** Weibull Grading
- **Style:** Stacked Molded SMD
- **Features:**
  - Stacked Assemblies That Offer Ultra-Low ESR

### TCP MODULE SERIES
- **Case:** 2H, 4H, & 6H
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,980µF
- **Reliability:** Weibull Grading
- **Style:** Stacked Molded SMD
- **Features:**
  - Stacked Assemblies that Offer Ultra-Low ESR
  - Customizable Configurations

### TBC SERIES
- **Case:** 0603, 0805, & 1206
- **Voltage:** Up to 50V
- **Capacitance:** Up to 100µF
- **Reliability:** Weibull Grading
- **Style:** Microchip SMD
- **Features:**
  - Volumetrically Efficient
  - Extremely Low DC Leakage

### TBM SERIES
- **Case:** D & E
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,500µF
- **Reliability:** Weibull Grading
- **Style:** Molded SMD
- **Features:**
  - Multi-Anode Design Used to Achieve Ultra-Low ESR

### TBJ SERIES
- **Case:** EIA Standard Sizing
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,500µF
- **Reliability:** Weibull grading
- **Style:** Molded SMD
- **Features:**
  - Based on EIA Standard Case Sizes
  - Enables Commercial Designs/Prototypes to be Upgraded
  - Lower ESR

### TBJ SERIES – 07016 & 95158
- **Case:** EIA Standard Sizing
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,500µF
- **Reliability:** Weibull grading
- **Style:** Molded SMD
- **Features:**
  - Based on CWR11 Form Factor
  - Low ESR Ratings
  - 95156: Original Standard, Limited Ratings
  - 75016: Current Standard, Full Weibull, Extended Range

### TCP MODULE SERIES
- **Case:** A-H Plus R & X
- **Voltage:** Up to 50V
- **Capacitance:** Up to 33µF
- **Reliability:** Weibull Grading
- **Style:** Molded SMD
- **Features:**
  - Widest Range of Case Sizes
  - Most Flexible of Surface Mount Form Factors

### TAJ SERIES
- **Case:** A, B, C, & D
- **Voltage:** Up to 50V
- **Capacitance:** Up to 33µF
- **Reliability:** Weibull Grading
- **Style:** Molded SMD
- **Features:**
  - CECC Specification 30801-005 & 30801-011

### TCP SERIES – 09009
- **Case:** 2H, 4H, & 6H
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,980µF
- **Reliability:** Weibull Grading
- **Style:** Stacked Molded SMD
- **Features:**
  - Stacked Assemblies That Offer Ultra-Low ESR

### TBJ SERIES
- **Case:** EIA Standard Sizing
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,500µF
- **Reliability:** Weibull grading
- **Style:** Molded SMD
- **Features:**
  - Based on EIA Standard Case Sizes
  - Enables Commercial Designs/Prototypes to be Upgraded
  - Lower ESR

### TBJ SERIES – 07016 & 95158
- **Case:** EIA Standard Sizing
- **Voltage:** Up to 50V
- **Capacitance:** Up to 1,500µF
- **Reliability:** Weibull grading
- **Style:** Molded SMD
- **Features:**
  - Based on CWR11 Form Factor
  - Low ESR Ratings
  - 95156: Original Standard, Limited Ratings
  - 75016: Current Standard, Full Weibull, Extended Range

### MEDICAL

AVX is the leading supplier of tantalum capacitors to the medical device industry. Our capacitors are used in most of the pacemakers, defibrillators, and neuromodulation devices manufactured each year.

**Our medical grade capacitors for life support implantable applications are manufactured in the Biddeford Maine facility, which is certified to ISO 13485, and have strict change control procedures to comply with FDA requirements for customer notification and approval of process or raw material changes. Other medical grade tantalum capacitors series offer high reliability and low leakage solutions for other applications within the medical device market. AVX offers two versions of medical grade tantalums: our traditional HRC5000 series uses Weibull grading for batch reliability assessment, and HRC6000 uses the new AVX Q-Process™, which applies an optimized burn in at 125°C and batch conformance test for reliability assurance.**

### CRITICAL APPLICATIONS DEFINED

- Implantable life sustaining devices or implantable non-life sustaining devices with less than one year life

### NON-CRITICAL APPLICATIONS DEFINED

- Implantable non-life sustaining devices with more than one year life, or non implantable life sustaining devices, or all other high reliability medical devices
### NON-CRITICAL HRC4000

AVX Biddeford has the most extensive test and analysis capability in the tantalum capacitor industry. We support custom solutions for the most demanding applications in medical, military and space applications. We routinely provide real-time X ray, DPA, life test, surge current test, 100% visual inspection and a variety of conformance test options for our customers. Components are regularly screened to statistically derived capability limits as well as customer specified limits to provide improved and consistent parametric performance. We also have a robust design and development process to qualify and deliver product meeting customer specification requirements.
